Own-domain citation is the share of 288 grounded answers that cited the tracked name's own domains (subdomains included). Citation share is of all 2,465 citations. Question 2 names Wegovy and Zepbound; Question 3 names Ozempic and Wegovy; Question 5 names Noom; Question 6 names WeightWatchers and Noom, so those counts include up to 12 answers each that name them by design. Removing 4 Core questions naming tracked subjects leaves 240 eligible answers. The top two are Wegovy (88/240) and Zepbound (84/240); their order does not change.

WHAT THE DATA SUGGESTS

How can weight loss brands improve their AI visibility?

These steps follow from the measured results above. They describe what the engines cited in this study and are not a guarantee of results.

STEP	WHAT THIS STUDY MEASURED
Put your facts on your own domain.	WeightWatchers' own domains were cited in 13.5% of grounded answers, Noom's in 8.7% and MyFitnessPal's in 4.5%.
Keep your facts accurate on the sites engines cite.	The most-cited sites other than the tracked names' own were healthline.com (in 27.8% of grounded answers), forbes.com (26.0%), fortune.com (20.5%), garagegymreviews.com (17.7%) and drugs.com (11.1%). General news and business press supplied 14.1% of citations and health publishers 11.6%.
Check each engine separately.	Gemini named WeightWatchers in 37.5% of answers against 25.0% on ChatGPT. ChatGPT named Ozempic in 27.8% of answers against 15.3% on Claude.
Watch names outside the tracked list.	Qsymia (20 answers), Eli Lilly and Company (19 answers), Novo Nordisk A/S (19 answers), Contrave (17 answers), Xenical (14 answers) were named often but were not tracked.
Re-run the same questions every month.	Compare counts and intervals, not ranks. The 24 questions are in the appendix.

24 questions asked three times on each of ChatGPT, Claude, Gemini and Perplexity, measured November 5, 2026. United States, English; Google retrieval uses desktop results. Models: gpt-5-mini, claude-sonnet-5-5, gemini-3.6-flash only, sonar-pro. Google AI Overviews come from DataForSEO, not inferred chat answers. Appearance counts returned text, including ungrounded answers; citation rates use grounded answers. Longer overlapping names suppress shorter ones; First mention is the earliest eligible name order. Own-domain rates include declared domains and subdomains; shared parent scopes may count for multiple names and cannot be summed as unique citations.

Own-domain citations count a domain plus all its subdomains, with the same rule in every table.

METRIC DEFINITIONS

- Appearance rate: answers naming the tracked name ÷ answers returned, with Wilson 95% intervals.
- First mention: average order in which the tracked name first appears (1 = first).
- Own-domain citation: grounded answers citing the tracked name's domains ÷ grounded answers.
- Citation share: citations to the tracked name's domains ÷ all citations.

LIMITATIONS

- Only 39 tracked brands are ranked; results are not an exhaustive market ranking.
- Only the tracked brands were scored. Untracked names that appeared often were not scored, including Qsymia (20 answers), Eli Lilly and Company (19 answers), Novo Nordisk A/S (19 answers), Contrave (17 answers), Xenical (14 answers).
- 348 of 360 planned results were returned. 12 AI Overview lookups were excluded after at most three total attempts.
- 60 successful Google searches: 55 overviews shown; 5 without an overview. Failures are excluded, not scored as zero.
- All returned chat answers had search sources.
- Questions 2, 3, 5 and 6 name Wegovy, Zepbound, Ozempic, Noom and WeightWatchers, so each of those counts includes up to 12 answers to a question that names it.
- Removing 4 Core questions naming tracked subjects leaves 240 eligible answers. The top two are Wegovy (88/240) and Zepbound (84/240); their order does not change.
- Names with no tracked own site are shown as None. Source types use Company / brand sites only for verified official organisations; other unresolved sites are Other / unclassified.
- Wilson 95% intervals are descriptive; overlapping leading intervals do not establish a sole leader. Measurements do not endorse medical, legal, financial or product claims.
- Informational questions only; the report states it is not medical advice and does not rank effectiveness. WeightWatchers has restructured and Jenny Craig has relaunched since the earlier edition. Generic names (semaglutide, tirzepatide, liraglutide, orlistat) are not counted as brand mentions. Telehealth weight-loss providers were added for this edition: Ro, Hims & Hers, Found, Calibrate, LifeMD, Henry Meds, Mochi Health, Eden and Form Health. The earlier edition excluded telehealth providers. Profile Plan and HMR announced in September 2024 that they had merged and operated under the HMR brand from July 2024. Profile's website redirects to HMR. The current ultimate owner could not be confirmed from the reliable public sources checked; no present Sanford ownership is assumed.
